EDUCATION

Anna University, CEG

B.Tech in Information
Technology

(2024-2028)

GPA: 9.59/10

SUMMARY

I'm a second-year engineering student passionate about front-end web development. I work with HTML, CSS, JavaScript, and basic React, creating clean, responsive interfaces. I'm eager to learn, detail-oriented, and a collaborative problem solver.

SKILLS

- Web Development: HTML, CSS, JavaScript, React (basic)
- Programming: C, Python
- Other: Machine Learning (basics), UI/UX Design

PROJECTS

Mark Predictor

- Description: A machine learning-based tool to predict student performance and visualize results.
- Stored marks in a CSV file and allowed users to check their marks and predicted performance category (e.g., Good, Average, Topper). Included graphical analysis to display data insights and predictions visually.

Interactive Portfolio Website

- Description: A modern, responsive portfolio website to showcase my skills and projects using React and other front-end tools.
- Built with React.js, Tailwind CSS, and TypeScript, with smooth animations and 3D visuals using Framer Motion and Three.js.
